

## REQUEST FOR COUNCIL ACTION

---

**MEETING DATE:** June 26, 2023

**PREPARED BY:** Jay C. Murzyn, P.E., Utility Operations Engineer

**AGENDA ITEM:** 2023 Sanitary Sewer Manhole Rehabilitation Project No. 23-13  
Accept bid and award contract  
Resolution No. 23-092

---

### PREVIOUS ACTIONS:

Council at their May 15, 2023 meeting, adopted Resolution No. 23-079 approving plans and specifications for 2023 Sanitary Sewer Manhole Rehabilitation Project No. 23-13 and authorizing advertisement for bids.

---

### RECOMMENDED COUNCIL ACTION:

Motion to adopt Resolution No. 23-092 accepting the bid for 2023 Sanitary Sewer Manhole Rehabilitation Project No. 23-13 and awarding to Innovative High-Performance Coatings at a contract amount of \$341,697.00.

---

### COMMENTS:

Bids for 2023 Sanitary Sewer Manhole Rehabilitation Project No. 23-13 were opened on June 13, 2023. The bids were as follows:

Bidder	Base Bid	Alt No. 1	Total
Innovative HP Coatings	\$260,500.00	\$81,197.00	\$341,697.00
Visu-Sewer	\$304,934.40	\$93,815.84	\$398,750.24
R&H Painting, LLC	\$315,670.40	\$103,783.44	\$419,453.84
Engineers Estimate			\$450,000.00

The bidding for 2023 Sanitary Sewer Manhole Rehabilitation Project No. 23-13 was competitive, with Innovative High-Performance Coatings submitting the low bid. The companies bidding on the project are well known for their work in the area of infrastructure rehabilitation.

Alternate No. 1 is the Main Street area. In order to minimize disruption to local businesses and the typically heavy retail traffic, this work uses a slightly different installation process and is planned to be done at night. Thus, it was bid as an Alternate in order to assess costs specific to Main Street and allow for elimination of the work should it be too costly. However, staff finds the costs for Alternate No. 1 to be reasonable in comparison to the Base Bid, and is recommending award.

It is recommended Council adopt Resolution No. 23-092 accepting Base Bid and Alternate No. 1 , and awarding to Innovative High-Performance Coatings, per the attached engineer's recommendation.

The project is funded from the sewer operating fund and will include rehabilitation of approximately 50 manholes at various locations throughout the city.
